

Parts sourced to your requirements.

EARTHMOVING | AGRICULTURE | INDUSTRIAL | FORKLIFTS

A simple approach to sourcing.

Boundless Supply Range (Pty) Ltd sources spare parts, wear parts and components for earthmoving, agricultural, industrial and material handling equipment. We work with various suppliers, selecting sourcing options according to each customer's requirements.

From a single replacement part to a list of components, send us your enquiry and we will assess where we can assist. OEM and aftermarket options can be explored, subject to suitability and availability.

SOURCED TO ORDER

We source against confirmed requirements and do not hold stock.

A broad range. One enquiry.

Examples of parts we can investigate sourcing for your equipment:

EARTHMOVING & CONSTRUCTION

Excavator, loader and construction spares. Ground engaging tools (GET), including bucket teeth and cutting edges; pins, bushes and undercarriage wear parts.

AGRICULTURE & TRACTORS

Tractor and agricultural machinery spares. Tillage and implement wear parts, bearings, seals and other replacement components.

INDUSTRIAL EQUIPMENT

Mechanical components and equipment spares, including pump parts, bearings, bushes, seals, couplings and related items.

FORKLIFTS & MATERIAL HANDLING

Replacement parts and components for forklifts and material handling equipment, assessed against the machine details and part requirements.

Tell us what you need.

Send the details you have available so we can identify the part and explore suitable supply options.

- 01** Machine make, model and serial number
- 02** Part number, description and quantity
- 03** Photos, drawings, dimensions or a sample reference
- 04** Delivery location and required date

We will review your enquiry and advise on the options we can offer, pricing and lead times. Supply is subject to confirmed specifications and supplier availability.
